

UM200 – Ultrasonic Level Meter

- ▶ 2-wire 4..20mA/3-wire 0...10V analog output
- ▶ Liquid level / distance measuring mode programmable
- ▶ Applicable to liquid and solids
- ▶ Narrow-beam
- ▶ Optional intrinsically safe model

UM200 contains an ultrasonic transmitter and an electronic module, the transmitter transmits ultrasonic pulses towards the level surface. The period during individual pulses spread towards the level and back was obtained and subsequently converted by the electronic module to an output current 4–20 mA or voltage 0–10V. Measuring range can be set through two keys.
